

Cura Care Homes

Mission, Vision, and Values:

Mission: To provide a safe, stable, and therapeutic haven for children and young people facing placement challenges, empowering them to heal, grow, and thrive through a trauma-informed, integrated pathway that prioritises their well-being and future success.

Our 'Integrated Pathway' comprises two key phases:

- **Initial Assessment and Stabilisation:** An intensive period of assessment upon arrival, designed to gain a holistic understanding of the child or young person's individual emotional, physical, educational, and social needs. This phase prioritises stabilisation in a safe and predictable environment.
- **Long-Term Pathway Plan:** Based on the initial assessment, a bespoke pathway plan is co-created with the child or young person, local authority, and other relevant professionals, guiding their longer-term therapeutic, educational, and developmental journey within Cura Care Homes.

Vision: A future where every child and young person, regardless of their history, has access to the nurturing and supportive environment they need to reach their full potential. We envision becoming a recognised leader in crisis intervention and therapeutic care, transforming the landscape of placement support for vulnerable children and young people.

Values:

- **Trauma-Informed Care:** Every interaction, policy, and practice is grounded in an understanding of the impact of trauma on children and young people. We create a safe and predictable environment that fosters trust, promotes healing, and minimises re-traumatisation.
- **Child-Centred Approach:** The child's best interests are at the heart of every decision. We listen to their voices, respect their individuality, and empower them to actively participate in their care planning.
- **Collaboration and Partnership:** We work closely with Local Authorities, families, and other professionals to create a seamless and integrated support network for each child. We believe that strong partnerships are essential to achieving positive outcomes.
- **Continuous Improvement:** We are committed to ongoing learning, evaluation, and refinement of our practices. We embrace evidence-based approaches and strive to provide the highest quality of care.
